KYPSELIAN SALON, is a group exhibition by Greek and international artists. The exhibition takes place at Snehta, just before the end of the year.

A group of established and emerging artists will present their work in an exhibition that takes the shape of a collective project. The exhibition is a living documentation of a continuous artistic activity in the city. Snehta Residency becomes for ten days a contemporary salon of sixty artists whose works exhibited include paintings, collages, sculptures, constructions, micro sculptures, publications and design objects. The opening of the show will be an opportunity to explore a diversity of creative initiatives and artistic practices.

The exhibition KYPSELIAN SALON is a visual happening during which the artworks will be available for a second year round at a surprising price. Snehta’s revenue from the exhibition will go solely towards its operation and activities in the community of Kypseli.

Within the context of the Salon, KYPSELIAN REFLECTIONS (Fokionos v.1) - A PANEL DISCUSSION will take place on Sunday 22 of December at 12.00 p.m. under the auspices of the Ministry of Culture.

The discussion will examine ways in which cultural workers, individual artists and local creative carriers operate within Kypseli, focusing on their framework, their means of cooperation, whilst finding ways of working together through mutual modes of coexistence. The discussion will also revolve around critical attitudes and concerns as well as considerations for their sustainability and future actions. This public action will be an attempt to map these activities and trigger a critical reflection on the contemporary challenges that the community of Kypseli is called to respond to.

Panel: The Panel is currently being formed and the participants’ names will be released soon!

We hope to see you soon!
